### Do These Beauty Products Really Work?

#### Lash-Growth Serum

**THE PRODUCT** Latisse, the first prescription treatment to grow eyelashes (\$120; [latisse.com](http://latisse.com) for more information).

**THE PROMISE** Longer, thicker, darker upper lashes after four months.

**THE EXPERT SAYS** "Latisse works amazingly well—I wouldn't be surprised if it outsells Botox," says Katie Rodan, an adjunct clinical assistant professor of dermatology at Stanford University School of Medicine. "I've seen it produce lashes that look like feather dusters."

**WE SAY** Love it! By Week three, our lashes were so long, they almost touched our brows. Everyone asked if we were wearing falsies.
